

DISCHARGE AND REFERRAL—H.R. 5057

Mrs. BOXER. Mr. President, I ask unanimous consent that the Committee on Health, Education, Labor, and Pensions be discharged from further consideration of H.R. 5057 and that the bill be referred to the Committee on the Judiciary.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF CERTAIN AUTHORITIES OF THE DEPARTMENT OF STATE

Mrs. BOXER. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of H.R. 6456, and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6456) to provide for extensions of certain authorities of the Department of State, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mrs. BOXER. I ask unanimous consent that the bill be read three times and passed, the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to this measure be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 6456) was ordered to be read a third time, was read the third time, and passed.

RESOLUTIONS DISCHARGED AND THE CALENDAR

Mrs. BOXER. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged and the Senate now proceed to the en bloc consideration of the following Senate resolutions: S. Res. 647, S. Res. 649. I further ask that the Senate then proceed to Calendar No. 922, S. Res. 620, and Calendar No. 923, S. Res. 622, all en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to consider the resolutions en bloc.

Mrs. BOXER. I ask unanimous consent that the resolutions be agreed to, the preambles be agreed to, and the motions to reconsider be laid upon the table en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL FETAL ALCOHOL SPECTRUM DISORDERS AWARENESS DAY

The resolution (S. Res. 647) designating September 9, 2008, as "National Fetal Alcohol Spectrum Disorders Awareness Day" was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 647

Whereas the term "fetal alcohol spectrum disorders" includes a broader range of conditions and therefore has replaced the term "fetal alcohol syndrome" as the umbrella term describing the range of effects that can occur in an individual whose mother drank alcohol during pregnancy;

Whereas fetal alcohol spectrum disorders are the leading cause of cognitive disability in western civilization, including the United States, and are 100 percent preventable;

Whereas fetal alcohol spectrum disorders are a major cause of numerous social disorders, including learning disabilities, school failure, juvenile delinquency, homelessness, unemployment, mental illness, and crime;

Whereas the incidence rate of fetal alcohol syndrome is estimated at 1 out of 500 live births and the incidence rate of fetal alcohol spectrum disorders is estimated at 1 out of every 100 live births;

Whereas, although the economic costs of fetal alcohol spectrum disorders are difficult to estimate, the cost of fetal alcohol syndrome alone in the United States was \$5,400,000,000 in 2003 and it is estimated that each individual with fetal alcohol syndrome will cost taxpayers of the United States between \$1,500,000 and \$3,000,000 in his or her lifetime;

Whereas, in February 1999, a small group of parents of children who suffer from fetal alcohol spectrum disorders came together with the hope that in 1 magic moment the world could be made aware of the devastating consequences of alcohol consumption during pregnancy;

Whereas the first International Fetal Alcohol Syndrome Awareness Day was observed on September 9, 1999;

Whereas Bonnie Buxton of Toronto, Canada, the co-founder of the first International Fetal Alcohol Syndrome Awareness Day, asked "What if . . . a world full of FAS/E [Fetal Alcohol Syndrome/Effect] parents all got together on the ninth hour of the ninth day of the ninth month of the year and asked the world to remember that during the 9 months of pregnancy a woman should not consume alcohol . . . would the rest of the world listen?"; and

Whereas on the ninth day of the ninth month of each year since 1999, communities around the world have observed International Fetal Alcohol Syndrome Awareness Day: Now, therefore, be it

Resolved, That the Senate—

(1) designates September 9, 2008, as "National Fetal Alcohol Spectrum Disorders Awareness Day"; and

(2) calls upon the people of the United States—

(A) to observe National Fetal Alcohol Spectrum Disorders Awareness Day with appropriate ceremonies—

(i) to promote awareness of the effects of prenatal exposure to alcohol;

(ii) to increase compassion for individuals affected by prenatal exposure to alcohol;

(iii) to minimize further effects of prenatal exposure to alcohol; and

(iv) to ensure healthier communities across the United States; and

(B) to observe a moment of reflection on the ninth hour of September 9, 2008, to remember that during the 9 months of pregnancy a woman should not consume alcohol.

NATIONAL ATTENTION DEFICIT DISORDER AWARENESS DAY

The resolution (S. Res. 649) designating September 18, 2008, as "National

Attention Deficit Disorder Awareness Day" was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 649

Whereas Attention Deficit/Hyperactivity Disorder (also known as ADHD or ADD), is a chronic neurobiological disorder that affects both children and adults, and can significantly interfere with the ability of an individual to regulate activity level, inhibit behavior, and attend to tasks in developmentally-appropriate ways;

Whereas ADHD can cause devastating consequences, including failure in school and the workplace, antisocial behavior, encounters with the criminal justice system, interpersonal difficulties, and substance abuse;

Whereas ADHD, the most extensively studied mental disorder in children, affects an estimated 3 to 7 percent (4,000,000) of young school-age children and an estimated 4 percent (8,000,000) of adults across racial, ethnic, and socio-economic lines;

Whereas scientific studies indicate that between 10 and 35 percent of children with ADHD have a first-degree relative with past or present ADHD, and that approximately ½ of parents who had ADHD have a child with the disorder, suggesting that ADHD runs in families and inheritance is an important risk factor;

Whereas despite the serious consequences that can manifest in the family and life experiences of an individual with ADHD, studies indicate that less than 85 percent of adults with the disorder are diagnosed and less than ½ of children and adults with the disorder receive treatment and, furthermore, poor and minority communities are particularly underserved by ADHD resources;

Whereas the Surgeon General, the American Medical Association, the American Psychiatric Association, the American Academy of Child and Adolescent Psychiatry, the American Psychological Association, the American Academy of Pediatrics, the Centers for Disease Control and Prevention, and the National Institutes of Mental Health, among others, recognize the need for proper diagnosis, education, and treatment of ADHD;

Whereas the lack of public knowledge and understanding of the disorder play a significant role in the overwhelming numbers of undiagnosed and untreated cases of ADHD, and the dissemination of inaccurate, misleading information contributes as an obstacle for diagnosis and treatment;

Whereas lack of knowledge combined with issues of stigma have a particularly detrimental effect on the diagnosis and treatment of the disorder;

Whereas there is a need for education of health care professionals, employers, and educators about the disorder and a need for well-trained mental health professionals capable of conducting proper diagnosis and treatment activities; and

Whereas studies by the National Institute of Mental Health and others consistently reveal that through proper comprehensive diagnosis and treatment, the symptoms of ADHD can be substantially decreased and quality of life can be improved: Now, therefore, be it

Resolved, That the Senate—

(1) designates September 18, 2008, as "National Attention Deficit Disorder Awareness Day";

(2) recognizes Attention Deficit/Hyperactivity Disorder (ADHD) as a major public health concern;

(3) encourages all Americans to find out more about ADHD, support ADHD mental health services, and seek the appropriate treatment and support, if necessary;
